Objectives

To work in a challenging environment where my knowledge can benefit the organization and prosper self as well.

Experience Summary

- I have overall 13 years + experience in Reactjs, Redux, RTK, JavaScript, HTML5, CSS3, Node, Express, AWS, Git, Angularjs, Ionic, Cordova, (UI development and Hybrid Mobile Apps).
- In-depth understanding of development, maintenance, production support. Worked on various web related technologies, possesses strong analytical and interpersonal skills and is well versed with complete software development life cycle. Confident and Consistent in producing results.
- Led the design, development, delivery, and maintenance of business and operational applications, ensuring seamless performance and scalability.
- Executed hands-on analysis and planning for both basic and complex solutions, including engineering and development efforts.
- Developed applications using Microservices architecture, REST APIs for scalable solutions.
- Monitored and troubleshoot applications to enhance performance and address potential issues in real-time.
- Provided thought leadership in identifying and implementing new technologies to help business units meet strategic objectives.
- Maintained a comprehensive understanding of supported applications, offering expert guidance for technical, business, and operational impacts.
- Fostered strong relationships within the organization and across technical teams, ensuring effective collaboration and communication on all projects.

PROFESSIONAL EXPERIENCE:

Photon Interactive

Mar 2025 - May 2026

Position : Technical lead

Responsibilities:

- Development and maintenance of applications using Reactjs, Redux, RTK, JavaScript, CSS3, HTML5, Google map. Creation of modules as per requirement of application, Integrate Endpoints URL, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.
- Lead the design and architecture of the module. Ensure the module aligns with the overall system architecture and project goals.
- Review and approve code written by team members, ensuring that it follows the best practices, coding standards, and quality guidelines.

Telus International**July 2019 - Feb 2025****Position : Module lead****Responsibilities:**

- Development of applications using Reactjs, Redux, RTK, Javascript, Fusion Chart, CSS3, HTML5. Creation of components, Integrate Endpoints URL, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.
- Lead the design and architecture of the module. Ensure the module aligns with the overall system architecture and project goals.
- Review and approve code written by team members, ensuring that it follows the best practices, coding standards, and quality guidelines.
- Be the go-to person for resolving technical issues related to the module, including debugging complex problems

HCL Technologies PVT LTD.**May 2017 - July 2019****Position: Lead Engineer****Responsibilities:**

- Development of web pages in Reactjs using bootstrap, CSS, HTML. Creation of components, Integrate Endpoints URL, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.
- Lead the design and development of technical solutions. Define the system architecture, ensure scalability, and ensure that the design meets both technical and business requirements.
- Oversee code quality by conducting peer reviews. Ensure that best practices, security standards, and architectural guidelines are followed throughout the development process..
- Be the go-to person for resolving technical issues related to the module, including debugging complex problems
- Work closely with other developers, designers, QA testers, and product managers to ensure that all aspects of the software are addressed and that work progresses smoothly.

BSL-i information technology Pvt. Ltd**Dec 2016 - Apr 2017****Position: Software Developer****Responsibilities:**

- Development of hybrid mobile app using ionic, angular. Designing of front end, logic, Coding and debugging errors.
- Write clean, efficient, and maintainable code based on project requirements. This includes developing new features, fixing bugs, and improving existing functionality.
- Participate in the design of software solutions, ensuring they are scalable, efficient, and align with the overall architecture.
- Follow coding standards and best practices to ensure the code is reliable, readable, and maintainable
- Work closely with other developers, designers, QA testers, and product managers to ensure that all aspects of the software are addressed and that work progresses smoothly.

Root Info Solutions Pvt. Ltd.**Nov 2012 - Nov 2016****Position: Software Developer****Responsibilities:**

- Development of hybrid mobile app using ionic, angularjs. Designing of front end, logic, Coding and debugging errors.
- Write clean, efficient, and maintainable code based on project requirements. This includes developing new features, fixing bugs, and improving existing functionality.

- Participate in the design of software solutions, ensuring they are scalable, efficient, and align with the overall architecture.
- Follow coding standards and best practices to ensure the code is reliable, readable, and maintainable
- Work closely with other developers, designers, QA testers, and product managers to ensure that all aspects of the software are addressed and that work progresses smoothly.

Project Details

#1 Mister Car Wash

Roles and Responsibilities: Results-driven Frontend Team Lead with hands-on experience leading the design and development of the Mister Car Wash web application. Skilled in building responsive, usercentric interfaces using ReactJS, Redux Toolkit, HTML5, and CSS3. Successfully integrated Google Maps API for location-based services, improving customer interaction and usability. Adept at mentoring developers, managing sprints, and delivering scalable solutions in Agile environments

Tools used: Reactjs, Redux, RTK, JavaScript, CSS, WordPress, PHP, AWS, Java, SQL, HTML, Git, NPM, VS Code

Roles : Technical lead

Team size : 5+

Duration : 12 Months

Description: Mister Car Wash is a customer-facing web platform, the largest car wash chain in the U.S. The application allows users to locate nearby car wash locations via Google Maps integration, manage memberships, view services, and schedule appointments. Built using WordPress, PHP, AWS, Java, SQL, ReactJS, Redux RTK, HTML5, and CSS3, with a focus on performance, responsiveness, and seamless user experience. Collaborated closely with backend, QA, and design teams in an Agile environment to ensure timely delivery and high code quality.

#2 Intelligent Insights

Roles and Responsibilities: Development of application modules using Reactjs, Redux, RTK, Javascript, Fusion Chart, CSS3, HTML5. Creation of components, Integrate Endpoints URL, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.

Tools used: Reactjs, Redux, RTK, JavaScript, CSS, Bootstrap, HTML, Git, NPM, VS Code.

Roles : Module Lead

Team size : 20+

Duration : 60 Months

Description: Intelligent Insights is a product of Telus international to handle all information related to bots developed by the company . It handles data gathering related to the requirement of new bot to all live bots currently as well as utilization of running bots and licenses.

#3 Channel 4

Roles and Responsibilities: Development of web pages in Reactjs using bootstrap, CSS, HTML. Creation of components, Integrate Endpoints URL, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.

Tools used: Reactjs, JavaScript, CSS, Bootstrap, HTML, Git, NPM, VS Code..

Roles : Lead Engineer

Team size : 20+

Duration : 15 Months

Description: Channel 4 is a British public-service free-to-air television network. I worked on the MINT Delivery Phase .

#4 Merck

Roles and Responsibilities: Development of web pages in Angularjs using bootstrap, CSS, HTML. Creation of modules, Integrate TIBCO BW End points URL and TIBCO BPM forms, Display data on page, writing frontend business logic. Delivery of epic as individual and in team depending on requirement.

Tools used: Angularjs, JavaScript, CSS, Bootstrap, HTML, SVN, TIBCO EMS, VS Code.

Roles : Front-end Developer

Team size : 10+

Duration : 10 Months

Description: Merck is an American multinational pharmaceutical company and one of the largest pharmaceutical companies in the world. I worked on CPWS .

#5 CCMobile

<https://precisionagriculture.esprida.com/buy-connected-crops-t1s1>

Roles and Responsibilities: Designing of front end, logic, Coding and debugging errors.

Tools used: Phonegap,HTML5,javascript,Ionic1,css3,JSON webservice,D3 charts and google map.

Roles : Developer

Team size : 5

Duration : 12 Months

Description: CC Mobile App is the interface for ConnectedCrops™ weather stations, available from Esprida. These weather stations help growers and farm managers efficiently monitor their crops remotely.

#6 AvantiFur

<https://play.google.com/store/apps/details?id=com.root.AvantiFurs>

<https://itunes.apple.com/in/app/avanti-furs/id370842598?mt=8>

Roles and Responsibilities: Designing of front end, Coding and debugging errors.

Tools used: Phonegap,HTML5,Angularjs,css3,JSON webservice,google map.

Roles : Developer

Team size : 5

Duration : 12 Months

Description: This is Mobile app. It support iphone, Android and all your devices.

This mobile app gives details about furs, notifications, events, news and near by store on google map and social media features.

#7 Rewardz

<https://play.google.com/store/apps/details?id=net.melewi.Rewardz>

<https://itunes.apple.com/us/app/rewardz-employee-perks!/id682367943?mt=8>

Roles and Responsibilities: Designing of front end, logic, Coding and debugging errors.

Tools used: Phonegap, HTML5,javascript,Jquery,Jquery Mobile,css3,JSON web service and google map.

Roles : Developer

Team size : 5

Duration : 6 Months

Description: This is a Mobile app. It supports iPhone, Android and all your devices .This app provides corporate privileges encompassing lifestyle essentials like medical, fitness, dining, travel and more. App has notification ,social sharing ,adds events to the local calendar and maps to find nearby stores .

Technical Skill Set

- **Web Technology:** HTML5,css3,Javascript, Angularjs, Reactjs, Ionic, Cordova, Phonegap.

- **Programming Language:** JavaScript, Python
- **Database:** Web services JSON format, SQLite
- **Tools:** VS Code, Git, SVN
- **Web Server:** Nodejs, Tibco EMS,AWS
- **Scripting Language:** JavaScript, Angularjs, Reactjs.

Professional Details

MCA from Indira Gandhi National Open University in 2011 from New Delhi.
BCA from Indira Gandhi National Open University in 2008 from New Delhi.

Personal Details

Address : Radhakrishna PG #21, Patel Public School, near Goldman Sachs, Kariyammana Agrahara, Bellandur, Bengaluru, Karnataka 560103

Passport No : T7790869

Interest: Desire to learn something Special, Traveling, Listening Music, surfing Internet.

Strength: Good at teamwork, excellent leadership qualities, punctual & responsible, consistent hard worker.
