Professional Summary

Full Stack Technical Lead with **13+ years of experience** specializing in the MERN/PERN stack. Expert in building scalable UI Architectures and implementing **AI-augmented development workflows** using **GitHub Copilot** to accelerate delivery cycles by 25%. Proven track record in performance optimization and delivering complex enterprise modules in high-traffic Agile environments.

Technical Skills

- **AI Tools:** GitHub Copilot, AI-Assisted Debugging, Automated Unit Test Generation.
- **Frontend:** ReactJS, Redux, RTK, JavaScript (ES6+), HTML5, CSS3, Google Maps API, FusionCharts.
- **Backend & Database:** Node.js, Express, REST APIs, Microservices, PostgreSQL, MongoDB.
- **Engineering:** UI Architecture, State Management, Component Design, Performance Tuning, AWS, Git.

Professional Experience

Photon Interactive

Mar 2025 – May 2026

Technical Lead

Bengaluru, India

- Leading architecture for the **Mister Car Wash** project; integrated **GitHub Copilot** to automate boilerplate code, reducing initial development time by **30%**.
- Orchestrating real-time location features using Google Maps API across **500+ locations** with AWS and Node.js.
- Reviewing code and enforcing engineering standards to optimize performance for high-traffic modules.

TELUS International

Jul 2019 – Feb 2025

Module Lead

Bengaluru, India

- Led **Intelligent Insights** dashboard; improved UI responsiveness by **40%** through RTK optimization.
- Mentored a team of 10+ engineers on modern frontend best practices and **AI-assisted refactoring**.
- Integrated Node.js REST APIs with MongoDB to handle a **2x increase** in real-time data synchronization.

HCL Technologies

May 2017 – Jul 2019

Lead Engineer

Bengaluru, India

- Delivered enterprise UI modules using ReactJS; reduced technical debt by **20%** via reusable components.
- Conducted architectural reviews that improved system maintainability and scalability for client platforms.

BSL-i IT Pvt. Ltd

Dec 2016 – Apr 2017

Software Developer

Delhi NCR, India

- Developed hybrid mobile applications using **Ionic and AngularJS** for diverse client requirements.
- Enhanced application performance by optimizing JSON service integration for real-time mobile data.

Root Info Solutions

Nov 2012 – Nov 2016

Software Developer

New Delhi, India

- Built hybrid apps (**CC Mobile, Rewardz**) using PhoneGap and Google Maps API.
- Implemented real-time data synchronization and push notification systems for mobile-first environments.

Education

MCA – IGNOU (2011) | BCA – IGNOU (2008)
